WHAT WE TAKE REFERRALS FOR:

Dr. Michael Maskill, DPM, provides a wide range of both conservative and surgical management for various foot and ankle disorders including:

- Achilles Tendon Pathology
- Adult Acquired Flatfoot (Low Arch)
- Ankle Fractures/Dislocations
- Ankle Sprains
- Ankle Instability
- Bunions/ Hallux Valgus
- Calcaneus Fractures
- Charcot Arthropathy
- Charcot-Marie-Tooth Disease
- Cavovarus Deformity (High Arch)
- Claw Toe
- Clubfoot
- Custom Molded Orthotics (done in office)
- Foot/Ankle Contractures
- Foot Drop
- Hammertoe Deformity
- Heel Pain/Plantar Fasciitis
- Lisfranc Ligament Injuries/Tears
- Morton's Neuroma
- Nerve Entrapment Syndrome (including common peroneal nerve)
- Osteochondral Lesions Of the Tibia/Talus
- Peroneal Tendon Pathology
- Pediatric Fractures
- Post-Traumatic Osteoarthritis (end stage primary/secondary arthritis of foot & ankle)
- Surgical Diabetic Ulcers
- Tarsal Coalition
- Tarsal Tunnel Syndrome
- Tailors Bunion Deformity
- Toe Walking
- Turf Toe
- Total Ankle Replacement Surgery

WHAT WE DO NOT TAKE REFERRALS FOR:

Due to high patient volume, we traditionally function as an orthopedic surgical & nonsurgical practice with a focus on the Foot & Ankle. Please note some of the following pathologies that we would ask are referred to a routine podiatry clinic:

- General Routine Foot/Nail Care
- Routine Diabetic Foot/Nail Care
- Chronic Diabetic Foot Ulcers (non-surgical)
- Warts/Calluses/Corns
- Paronychia/Ingrowing Toenails
- Onychomycosis (Toenail Fungus)
- Tinea Pedis (Athletes Foot)
- Neuropathy Due to Lumbar/Sacral Etiology
